

I am a young French designer and I have an advertising and marketing background. I have always been passionate about Art and Design, ever since I was a student at “*Les Beaux Arts*”, *Fine Arts University* in France.

In 2012 I was looking for a work of art for my own interior design. Finally, I created my first canvas 1m\*1m; with relief, bright colors and intense feelings. The result was better than I could imagine ; this is the power of Art.

I started to paint different series and participated in solo and collaborative exhibitions with others Artists.

After a series of events back in France where I come from, I decided to come and live in Singapore to discover a new environment and culture, and thus share and exchange experience through different techniques and trends. Human contact is essential to my personal development and creative inspiration. “Art is sharing. No one was born an Artist but becomes an Artist. Art is opening senses and imagination”.

**My artistic concept** is based on the use of upcycling materials.  
I wish to offer an art that is accessible to all.

By our daily consumption, we have plenty of different materials at home; paper, carton, plastic, aluminum, tissues, decorative elements. I stimulate the creativity that exists in each of us, while offering pleasure and imagination around original and fancy artistic creation.

My paintings follow **an innovative style where each work is a prototype** made of painting, sticking, and recycling with fancy decorative accessories. My tools and work techniques also involve recycling and imagination. Together the set makes a **work of glamour in relief**, echoing my natural sensitivity. My paintings match and enhance any type of interior. I am a *graduated interior designer* and can easily adapt my artwork along my customers’ requirements. It’s tailor-made Art, with my personal Artist touch.

I want to offer joy and dynamism as well as a non-conformist style. Each artwork has a unique history and reflects a special feeling, after spending unique and intense time on each.

### **I worked on different series**

- Feelings & memories: Work oriented on imagination and movement.
- Reconstruction of Singapore declined by themes : Building & City, Shapes & shadow, Lights. My shaping work is based on Singapore photography that I take day/night
- Vegetation : Interpretation and use of vegetation as a natural element of recycling.
- Themes: Christmas, Chinese New Year, Deepavali, Hari Raya...: along the different culture existing in Singapore

Each piece is a mixed media, displaying different techniques, working on various supports, with different materials and paintings.

I add my unique and glamorous touch by using various decorative elements like fabrics flowers, pearls, feathers, glitter...
